press release

UKUUG's Linux Developers' Conference comes to Bristol

4th July - 7th July 2002

Once again, a wide cross-section of the Linux development community will gather at the start of July for the UK Unix User Group's summer technical conference.

The conference moves about the UK from year to year: in 2002 we're visiting Bristol; in 2003, Edinburgh.

Speakers from nine countries will present their work, forming our largest programme to-date.

We begin on Thursday 4th July with tutorials on Shared Libraries, given by Ulrich Drepper, the glibc maintainer, and the Linux Terminal Server Project, given by the project's founder, Jim McQuillan.

After a Linux printing workshop on Friday morning (CUPS/KDEPrint), the conference proper begins at lunchtime and runs through to Sunday lunchtime.

Highlights of the programme include:

- * The Linux Kernel (Marcelo Tosatti, 2.4 maintainer)
- * The Hurd (Marcus Brinkmann)
- * Linux on AMD's Hammer architecture (Bo Thorsen)
- * Linux-ABI (Christoph Hellwig)
- * Dynamic Binary Translation (Mark Probst)
- * FreeDCE (Luke Leighton)
- * Emdebsys (Wookey)
- * Gnome 2.0 (Michael Meeks)
- * DotGNU (David Sugar)
- * Exim 4 (Phil Hazel)
- * Lego programming (Stephen Coast)
- * glibc2.3 (Ulrich Drepper)
- * Valgrind (Julian Seward)
- * Zope 3.0 (Stephan Richter)
- * MySQL (David Axmark)
- * Free Telephony (David Sugar)
- * Bugzilla (Gerv Markham)
- * RT (Simon Myers)
- * Subversion (Sander Striker)
- * MathMap (Mark Probst)
- * WorldForge (Alistair Riddoch)

And also: Securing Linux Servers; Wireless Networking; Grid Computing; LTSP; PHP; Linux in Undergraduate Teaching; Reliability, Availability & Serviceability

And, if we're lucky, a chance to examine IBM's Linux Wristwatch and maybe even Sony's PlayStation 2 Linux!

Sponsorship and Exhibitor opportunities are available

Sponsors: IBM & AMD

Media Sponsor: OSDN
